

Somabar Quick Start Guide

This is a limited Quick Start Guide. For full set-up and operating instructions, please refer to the Somabar User Guide found in your Somabar App or on the Somabar website (somabar.com)

Somabar comes with these additional parts:

(6) 750ml SomaPods,
(1) 150ml SomaPod, &
(1) 750ml Cleaning SomaPod

power cord

iPad Stand

Not Included:
Required
iOS Device
iOS 11+ compatible
(Apple iPad mini
recommended)

1. Fill + Plug In

Fill Somabar's fresh water tank with water and then plug Somabar into a standard wall outlet.

*side view of Somabar shown above

2. Get Connected

Download the Somabar App to your iOS Device. Connect to Somabar by tapping "Get Started" and following the in-app instructions. Your initial password is "Cheers!"

3. Insert & Tag SomaPods

Firmly place filled SomaPods on Somabar's pod-seats. If using the optional 150ml (bitters) SomaPod, it is seated under Somabar's top lid. Tag each SomaPod with its filled ingredient by tapping on the circle corresponding to its location as shown on the Somabar App home page. Somabar remembers SomaPod ingredients until they are re-tagged with a different ingredient.

4. Enjoy!

Based on the contents of your SomaPods, the Somabar App will list all the drinks you can make in the "Live Drinks" section of your Somabar App. Tap on a recipe to dispense your cocktail.

Cheers!
